

The past three years have seen Saracen invest over \$60m in the Carosue Dam Operations, culminating in its inaugural gold pour in early 2010. Saracen has now emerged as a mid-tier Australian gold producer with a strong resource base of 3.3Moz, and a seven year mine life based upon current reserves. Gold production is sourced from several open pits, with additional high grade ore to be sourced from underground projects currently under development. With the elimination of debt, Saracen is now ideally placed to develop into a significant mining house through the fast tracking of future growth projects and an aggressive exploration program, in what is one of the most prestigious and prospective gold districts in Australia.

## SENIOR EXPLORATION GEOLOGIST & PROJECT EXPLORATION GEOLOGIST

Due to recent expansion of exploration activities we currently have vacancies for both a Senior Exploration Geologist and Project Exploration Geologist. Reporting to the Exploration Manager, the successful applicants will be responsible for designing, implementing and managing exploration programs.

Either role will provide you with an opportunity to be a key member of a small, dynamic exploration team, where you will be exposed to a wide variety of geology within the highly prospective South Laverton region, working on variety of projects, from grass roots to advanced exploration.

### The Position

- Plan and coordinate drilling programmes, geological mapping, surface sampling, geochemical programmes and geophysical programmes.
- Undertake prospect and tenement reviews and prepare reports (POWS, drill programmes etc).
- Analyse exploration data and develop geological models.
- Develop procedures and guidelines to ensure high quality standards are employed for geological data capture and QAQC.
- Train and mentor Exploration Geologists and Field Technicians.
- Communicate with pastoralists, landholders and other key stakeholders.

### The Candidate

- Appropriate Geoscience Qualifications (BSc or equivalent, BSc (Hons) preferred).
- Several years of experience working on exploration/resource definition programmes, preferably with exposure to Goldfields regional geology and controls on economic mineralisation. (10+years for senior, 5+years for project).
- Experience with relevant mining and GIS software (current software used by exploration group includes: Micromine, ArcGIS and AcQuire).
- Sound communication and interpersonal skills

**This is a camp based role, offered on an 8:6 roster FIFO from Perth or DIDO from Kalgoorlie.**

**Here is your opportunity** to join a new player in the gold mining landscape. With a small company culture, but big mining prospects, Saracen has the opportunities you are after in the right environment.

Saracen offers a competitive salary package including salary packaging arrangements, health and personal insurances, share options, study assistance and discounted gym membership.
