

CAE is a global leader in modeling, simulation and training. The company employs more than 7,500 people at more than 100 locations in 20 countries.

As a leading provider of technology and consulting services to the mining industry, CAE Mining prides itself as a conduit for realising innovative techniques, expert knowledge and technology as industry best practice. We have grown by over a third in the last 12 months and we continue to search for more high calibre individuals wanting to join our rapidly growing organisation.

Perth and Brisbane based roles | Excellent package and bonuses
Dynamic and energetic team | Professional development opportunities

Senior Mining Consultant

The Position

The position of Senior Mining Consultant within CAE Mining represents an important role within the company. It requires technical expertise, mentoring and business development skills. As a Senior Mining Consultant you will be working with the world's largest mining companies to optimize their existing operations and evaluate future projects.

You will also be involved in embedding sustainable mining systems.

The major categories of workload to be expected in the position are:

- General mining consulting
- Software implementation and training
- Software support

The Requirements

- Qualified Mining Engineer or Geologist with 7+ years experience
- Experience in operational mine planning and scheduling, with skills in mine planning and/or optimisation software (e.g. Mine2-4D, Vulcan, Surpac, Studio, EPS, NPVS)
- Self-motivated, ability to work independently or as part of small teams, produce results within defined time frames
- An interest in the application of technology to improve mining processes
- Previous consulting experience (desirable)
- Financial modelling skills (desirable)

Travel Requirements

Due to the diverse and often remote geographical location of the CAE Mining client base, travel requirements form part of the role of senior mining consultant. Some international travel may be required from time to time.

Executive Consultant

The Position

The position of Executive Consultant within CAE Mining represents a preeminent role in its strategic development plan. The position is an exciting opportunity for exceptional individuals to advance the use of sophisticated techniques that add value to resource companies. Drawing on your extensive industry experience, you will have the opportunity to apply this "know-how" via world leading technology – whilst advising and mentoring the next generation of resource professionals.

Recognising that each Executive Consultant brings a unique set of skills to CAE Mining, our "execs" typically work across a variety of areas including: high-level consulting assignments, post-graduate curriculum development, collaborative research projects, product conceptualization and mentoring.

The Requirements

Your strengths are in the areas of technical expertise, business development, innovative thinking and people management. In particular our Executive Consultants have the following strengths:

- Qualified resource industry professional with 15+ years of operations and consulting experience
- Experience in implementing new processes, techniques or technical software
- Self-motivated, ability to work independently or lead small teams
- Post graduate qualifications in a technical discipline, business and/or economics

Travel Requirements

Due to the diverse and often remote geographical location of the CAE Mining client base, travel requirements form part of the role of executive consultant. Some international travel may be required from time to time.
